Web Design **&** *Web Hosting*

Now it's easier than ever before to improve your image and promote you and your bussiness to an unlimited number of people and opportunities. How? The answer is the Internet. We can make you visible on the web without you moving a finger.

Our proffessional web and email hosting will provide all the services you need in a cost effective and sustenable manner. All you have to do is present your ideea to our design team wich will come up with the layout and design for your website. You will also be able to choose your domain name for the site that best suits your activity or company. Once this is done in the shortest possible time your site will be online and visible to the world.

Once you already own a site and domain name you can use that for personalized email addresses, for example you@yourbussiness.com or you@yourbussiness.iq We offer you highest quality email services that are running flawless for a few years now. Some of the main features are high availability, access to your mailbox from anywhere and from any type of device capable of handling emails. For example you can have your email address set up on your office desktop, on your laptop and on your smartphone at the same time. All these devices will be permanently synced and updated giving you unrestricted access to your emails.

Professional web hosting on servers located in Romania and unlimited traffic. All our customers will freely benefit from the most advanced control panel: cPanel/WHM.
- **Fast web domain registration**
- **Colocated servers** with uptime of 99.9% provided with total redundant dependencies.
- **Virtual Dedicated Servers (VDS)** are the next generation of Virtual Private Servers (VPS) and by acquiring a VDS license you will receive a free cPanel/WHM licence and administration for your VDS server.

Storage space – Unlimited
Your html files, scripts, images, multimedia files and emails are all stored on the server. There is no maximum disk quota - you'll have plenty of room for all your websites.
However, it is very important that you use storage space with consideration and only for files which are directly related to your online presence. The fact that we don't set a limit, doesn't mean this resource is infinite.

Traffic - Unlimited
Internet connectivity is one of the strong points of our infrastructure. We have over 10 national providers and 6 internationals. Not only do you not have a transfer limit, but your website will have great loading time for any visitor in the world.

Hosted domains - Unlimited
Host all your websites with us and you'll have easier administration and no extra cost.

Subdomains - Unlimited
Organize your website content however you want. You're free to use as many subdomains as you need, at no extra cost.

Domain registration
.com or .anything domain names

Email
All standard communication protocols run smoothly in our network (POP3, IMAP, SMTP) and you have the possibility to set autoresponders.
You also won't have to worry about spam or viruses - we have very advanced filters in place, safeguarding your inbox.

Security

Backup
We backup our servers daily so you can rest assured your data is safe with us.

Firewall hardware - Juniper
We use a high performance, hardware, firewall solution, which is much more advanced than any similar software.

Intruder detection
Each server is connected to a traffic filtering device that prevents unauthorized access to information and malware attacks.

DoS/DDoS protection

Flood attacks are stopped by a dedicated hardware equipment, that prevents bulk traffic from reaching the servers.

Optional services

SSL + dedicated IP

If your website collects sensitive information from users, it's very important that you have an SSL certificate. SSL encryption gives you users the certainty that their data is protected and can't be found by unauthorized third parties.
SSL certificates can only be acquired with a dedicated IP.

Technical Support - 24/7/365

Our technical support means a team that's 100% dedicated to providing you with the best service and ensures:
- service monitoring 24x7x365
- phone and email support 24x7x365

For clients without access to an information technology department, *website creation* can seem like an overwhelmingly complex, daunting and time consuming task. You can waste valuable time and money with do-it-yourself website design or worse yet by hiring a recent technology graduate looking for web development experience at your expense!

Our website designers have extensive experience in website creation. They will give your company website design the right look and feel with great graphics and images. Our programmers create stable and robust start-up websites. Your site will have a professional image that is highly functional and easy to navigate. Clear design and content will keep your visitors coming back regularly.

Does your site need a facelift? Our programmers can have your website looking young again with vibrant graphics and more intuitive features.

The design of your website is one of the most integral components of your web success. In most cases you have 10 seconds to impress site visitors with your design and professionalism, after which they will decide to read further through your site or simply leave.

You will find an instant impact and a positive impression should be synonymous with your web site design.

Prior to starting your design we conduct an analysis of your target market and can provide advice on a design most likely to appeal to your customers.

Here are some examples of our work:
