IT&C Security

- Security testing IT systems and networks;
- Support in solving vulnerability problems
- Creating IT security politics;
- It security organization and centralization

Oxygen Computers has implemented both the Quality - Management System and the Environment System because we think it is important for us to maintain and improve the product quality and services offered to our clients.

Partners

Oxygen Computers works closely with a large number of strategic partners. Among these we can include international brands like: IBM, Microsoft, Fujitsu, Xerox, HP, Lenovo, APC, Intel, Cisco, Allied Telesis, ASUS, VMWare.

Oxygen Computers develops specific solutions for its clients using technologies made available by the same partners mentioned above, technologies which are recognised and previously tested. It offers security and future compatibility with the global standards, and the opportunity to use new technology.

Our team is at your disposal for any problems that may occur in your IT&C infrastructure and can help you transform your business, making it more efficient and productive.

Why us? Because of our complex solutions and services, for the care of our customers requests!
